

GBMC

Patient Questionnaire

Patient Name: Tanisha J.

1. What brought you to GBMC?

I came to GBMC to have Bariatric Surgery.

2. Please briefly share your experience at GBMC, including what unit(s) you were treated on.

I was seen at the Comprehensive Obesity Management Program with Dr. Moeinolmolki. I first started the program by visiting a information session and then went through their program in order to have the surgery.

3. How has your experience changed your or your family's life?

I just enjoy life now, I am able to go out and do the things I love and have a better quality of life.

4. Are there any particular staff (doctor, nurses, other clinicians) that you were particularly impressed with, and if so, why?

Dr. Babak Moeinolmolki and his staff at the Comprehensive Obesity Management Program were all great. My questions were always answered and they helped me through the entire process of surgery. Also, when I stayed in the hospital after the surgery, the care I received from the nurses was excellent.

5. Would you recommend GBMC to family and friends, and if so, why?

Yes, I would recommend GBMC to family and friends. I had an overall great experience. I thought GBMC was a nice hospital with great staff.

6. Please tell us a bit about your personal story before you received treatment.

I had been overweight for most of my life. At my heaviest I weighed about 325 but got that down to 296 pounds before surgery. I had tried numerous other ways to lose the weight myself, but the weight loss was not that much and sometimes when I would fall off track, I would gain the weight back. I also had several medical problems which included high blood pressure and diabetes.

7. Where are you now? Have you completed treatment or are you still receiving treatment?

As of right now, I have still kept all the weight off and have none of my previous medical problems. I still have follow up visits with the Comprehensive Obesity Management Program.
